

Your Guide to Digital Transformation

# Microsoft Sentinel

How Lightstream can help you optimize your security posture with Microsoft's cloud-native SIEM

## Introduction

Microsoft Sentinel is a powerful and scalable SIEM solution that leverages the Azure cloud platform to collect, analyze, and respond to security threats across your hybrid environment. Sentinel enables you to reduce the complexity and cost of security operations, improve your threat detection and response capabilities.

However, deploying and managing Microsoft Sentinel can be challenging without the right expertise and guidance. You need to design and implement a robust and secure architecture, configure and tune the data sources and analytics, and optimize the alerting and automation features. You also need to ensure that your Sentinel environment is compliant with industry and regulatory standards, and that you have the visibility and control over your security posture and performance.

That's where Lightstream comes in. Lightstream is a Microsoft Gold Partner and a leading provider of cloud and security services. Lightstream can help you design, deploy, and manage your Microsoft Sentinel solution, leveraging our deep experience and best practices in cloud and security operations. Lightstream can help you achieve the following benefits with Microsoft Sentinel:

- Accelerate your time to value and reduce your operational costs with a fully managed Sentinel service.
- Enhance your security posture and compliance with a customized and optimized Sentinel architecture.
- Improve your threat detection and response with advanced analytics and automation capabilities.
- Integrate your Sentinel solution with your existing security tools and workflows.

## Why Choose Lightstream?

Lightstream is a trusted partner for Microsoft Sentinel, with the following credentials and capabilities:

- Microsoft Gold Partner with competencies in Cloud Platform, Security, and Data Analytics.
- Microsoft Azure Expert Managed Service Provider (MSP) and Azure Security Deployment Partner.
- Microsoft Sentinel Early Adopter and Co-Sell Ready Partner.
- Experienced and certified team of cloud and security experts, with deep knowledge and skills in Microsoft Sentinel and Azure.
- Proven track record of delivering successful Sentinel projects for customers across various industries and sizes.
- Customer-centric and flexible approach, tailored to your specific needs and goals.

## Credentialed & Experienced

Lightstream is a leading technology integrator with 20+ years in the network, cloud, and security fields. Lightstream is a Microsoft Gold Partner and a distinguished Security Solution Provider.

## Lightstream Managed Sentinel

Lightstream Managed Sentinel is a comprehensive service that covers the entire lifecycle of your Microsoft Sentinel solution, from design and deployment to management and optimization. Lightstream Managed Sentinel includes the following components:

**Assessment:** Lightstream will assess your current security environment, identify your data sources and requirements, and recommend the best Sentinel architecture and configuration for your needs.

**Deployment:** Lightstream will deploy and configure your Sentinel environment, including the data connectors, analytics rules, dashboards, workbooks, playbooks, and incident management features.

**Management:** Lightstream will monitor and manage your Sentinel environment, ensuring its availability, performance, and security.

**Optimization:** Lightstream will continuously optimize your Sentinel environment, applying the latest updates, best practices, and enhancements. Lightstream will also help you fine-tune your analytics and automation capabilities.
